

IMPROVE
YOUR QUALITY
OF LIFE
IN PURE AIR SPACES

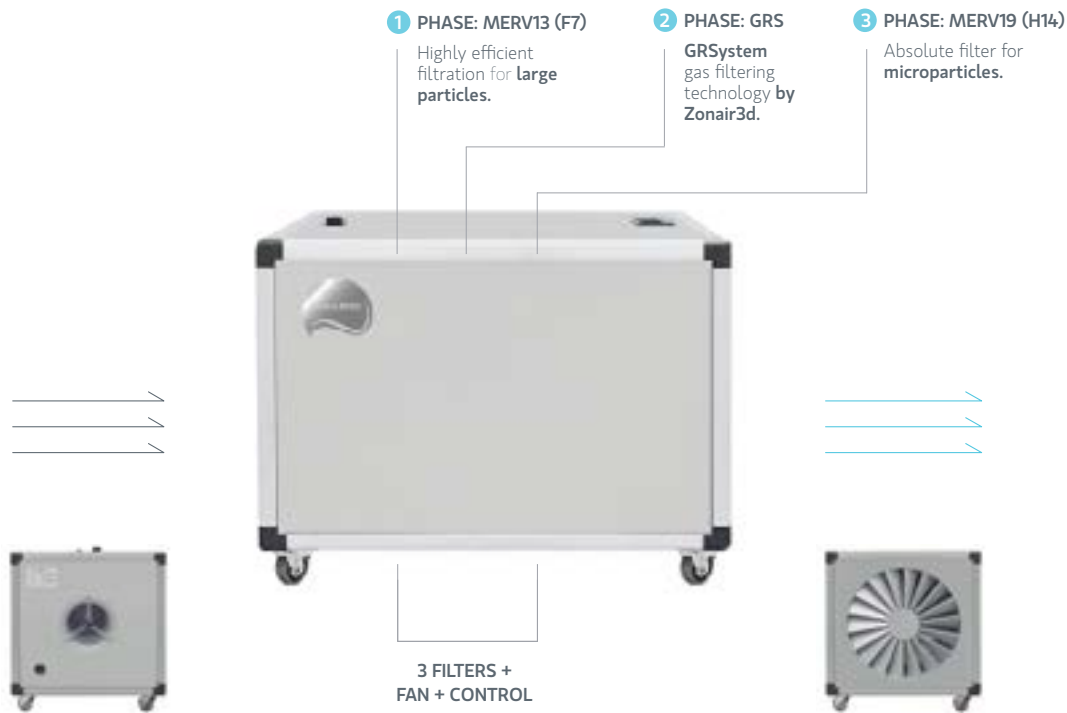

PURE AIRBOX

Pure Airbox is a **portable air purification device** designed for use in **building interiors**. Its exclusive system filters and purifies polluted air to produce air of optimum quality that is **free from contaminating particulate and environmental ozone** and to **reduce toxic, irritant and carcinogenic gases to comfortable levels**.

This **filtering system** has been proven effective and consists of **three stages**:

Pre-filtering for large particles; an **absolute filter** for removing microparticles; and the exclusive filter **GRSystem** by Zonair3D, which reduces gases to comfortable levels via an activated carbon filter that was developed by the R&D team at Zonair3D.

TECHNICAL CHARACTERISTICS

USE	Rooms, domestic areas, enclosed spaces
DIFFUSER	Aluminium rotational structure
MATERIAL	Steel sandwich panels for soundproofing
RECIRCULATIONS	6 rec./hour (every 10 min)*
MOTOR	EC (ErP)

FILTERING STAGES	Pre-filter MERV13 (F7) / GRS Gas filter / Absolute filter MERV19 (H14)
SIZE/WEIGHT	52 x 73 x 55 cm / 50 kg
MAXIMUM FLOW	660 m ³ /m
CONSUMPTION	178 W
POWER SUPPLY	230V / 50-60Hz

* Based on a space measuring 45m² at maximum speed
